

SQUARE HINGED POLE 20-50 FT.

The shaft is fabricated from steel and square in cross section. The longitudinal seam is submerged arc welded. The shaft is hinged by means of a steel pin, approximately at the halfway point. The lower portion of the shaft is fitted with a counter weight making the hinging action very simple. Standard termination of the shaft is a 2-3/8" OD x 5" tenon.

ANCHOR BASE

The anchor base is fabricated from structural steel conforming to G40.21-44W and is circumferentially welded inside and outside to the pole shaft.

HAND HOLE & WORM GEAR WINCH

All shafts are supplied with a 5"x 3" (or 8"x 4") hand hole opening and a weather proof cover. A ground lug is affixed inside the shaft on centre with the hand hole opening. Mount for worm gear winch including 2000 lb. H.D.G. Cable (20' to 50') available with custom Weatherbox.

FINISH

The standard finish is 2C polyurethane or H.D.G..

NOTE

Consult the wind map for wind loading in your area.
